

DUAL LITE

AUTHENTIC LIFE SAFETY PRODUCTS SINCE 1940

**LEGENDARY QUALITY.
CUTTING-EDGE INNOVATION.
BOUNDLESS CUSTOMER CARE.**

A History of Growth

Creating life safety solutions that shape the industry comes naturally for Dual-Lite. In 1940, the company started with a unique idea: construct an exit sign using dry cells that could operate in normal and emergency modes. That patented concept of dual operation inspired the company's name. The loss of life in the worst nightclub fire in history spurred a nationwide uproar that led to stricter enforcement and addition of safety requirements. Dual-Lite responded by establishing itself as an industry force. The first dedicated life safety solutions company and the industry's first to earn ISO9002 certification, Dual-Lite continues to provide the superior value lighting professionals trust for applications where it matters most.

Full speed ahead

It's no wonder that with its 100-year heritage of forging growth through product innovation, the Hubbell Lighting family of brands chose Dual-Lite as its premier life safety solutions brand. An introductory statement made by Harvey Hubbell, III in the company's 50th anniversary annual report explaining the company's philosophy speaks to the attitude and approach of Dual-Lite today:

"The present management is proud of the Company's past, but concerns itself entirely with its present and future, recognizing that times change and that it is the service of today that determines our position in the industry tomorrow."

Dual-Lite is committed to continuing its heritage of unwavering quality, cutting-edge product innovation and outstanding customer support.

Mission: Innovation

Now more than ever, Dual-Lite is dialed-in to the voice of the marketplace. Through market research, we're maintaining an ongoing dialog to fuel innovation. This "listen and learn" business philosophy drives our ability to understand customers' needs and expectations and respond quickly. We empower our research and development team with this vital intelligence. The result? A broad line of commercial and industrial life safety solutions that provide superior value. Easy-to-use product information and online resources. And a fully charged commitment to customer support.

Dual-Lite is no stranger to preserving the environment for future generations. The ever-increasing necessity to improve energy conservation continues to inspire us to offer more energy efficient products.

The first floor of the new Hubbell Lighting, Inc. in Greenville, South Carolina hosts an industry-leading 25,00-square foot Lighting Solutions Center (LSC). Dual-Lite inverters play a prominent role in the LSC, and also power critical building loads in case of emergency.

Quality. Reliability. Performance.

At Dual-Lite, quality is the hallmark of everything we do. No wonder we own the industry's first ISO 9002 certification. Beginning with our initial design and extending through every stage of production, you'll recognize quality in the aesthetics of our product lines, ease of installation and trouble-free operation. The reliability of our electric and electronic components, and the advanced materials used in our chassis and housings is yet another testament to our stringent standards. Our customers know Dual-Lite products must measure up to exacting performance criteria and withstand a series of thorough inspections, so they can buy with confidence.

When emergencies strike, public safety demands the proper operation of emergency lighting and power products to assure orderly egress. Ensuring full protection means our life safety products must perform reliably, on demand, without question. It's an unyielding standard Dual-Lite sets for itself...one that has resulted in millions of trouble-free hours of operation.

Taking life safety applications farther.

Nationwide interviews to learn what customers want and need inspired the Dual-Lite product lineup. This product-shaping feedback plus our high standards for quality continue to deliver products that set the bar for the industry. That means millions of hours of trouble-free operation, plus reduced operating and maintenance costs, come standard with every authentic Dual-Lite exit sign, emergency lighting unit and central lighting inverter. Together, they create total solutions and ultimate value for commercial and industrial life safety applications.

Exit Signage

Innovative designs that deliver energy-savings and aesthetics at every turn

Whether your application demands sleek lines and a low-profile silhouette or rugged durability, Dual-Lite offers the perfect solution for every commercial, industrial or institutional application. High quality, high performance components, easy installation and innovative, energy-conscious engineering ensure long-life, worry-free operation and lower maintenance.

Two distinct concepts drive Dual-Lite's exit sign lineup, offering exit signs and emergency lighting that create a unified look. The LiteForms® Collection of life safety equipment offers style and substance backed by a tradition of excellence. The ClearView™ Collection is focused on value with cost-effective, attractive products that perform reliably. Each of these families feature LED exit signs that harmonize with their surroundings and deliver advanced performance. Additionally, each family is armed with a broad choice of Ultrex products for severe condition applications.

Emergency Lighting

Illuminating the path of egress with reliability, quality and innovation

Count on Dual-Lite emergency lighting and you'll never be left in the dark. Ready, willing and able to light the way when emergencies strike, our emergency lighting lineup features high performance lamps, worry-free batteries and an optional, intuitive Spectron[®] diagnostic system. Easy to install, sturdy construction and aesthetically pleasing designs make Dual-Lite emergency lighting the premier choice for every environment.

Because Dual-Lite plays an integral part in helping to craft safety lighting codes, our emergency lighting solutions meet or exceed all code requirements. Utilizing the latest technology and remaining dedicated to innovation, Dual-Lite continues to push the emergency lighting envelope for a safer tomorrow.

Central Lighting Inverters

Built-in energy security guaranteed by authentic Dual-Lite quality and a preventive maintenance program

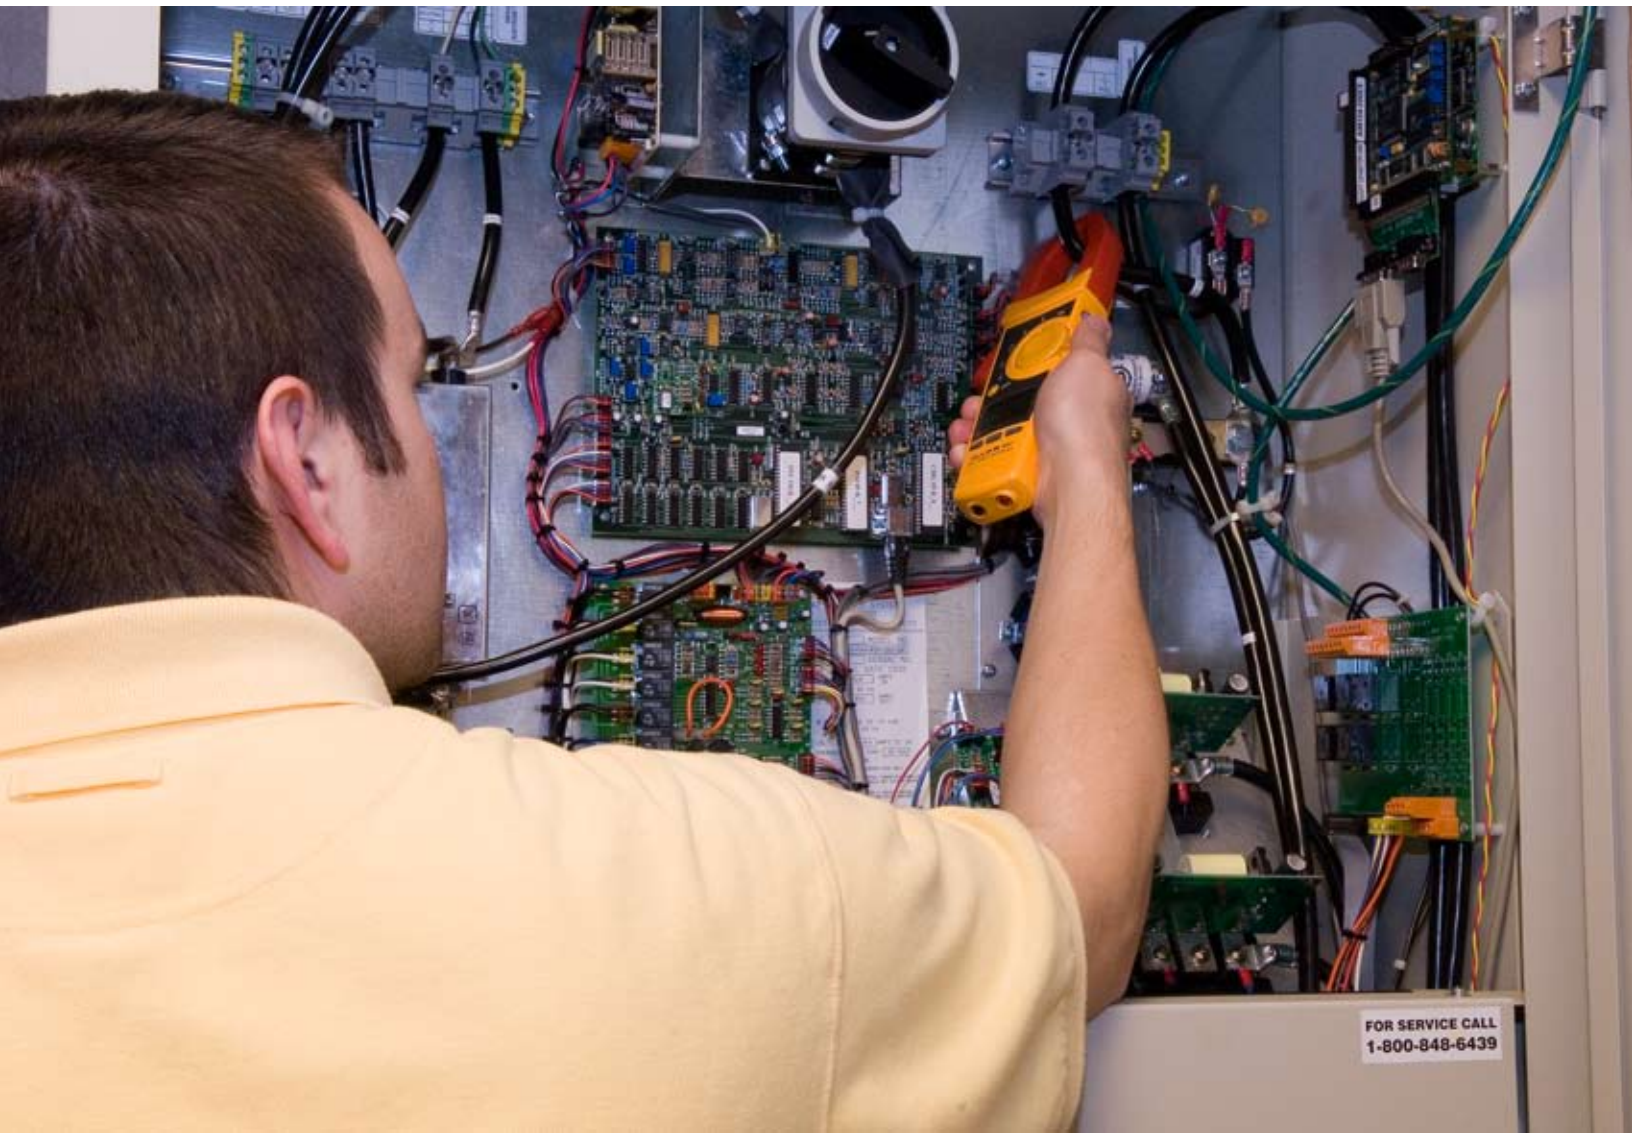

Meeting the complex energy needs of today's business facilities requires continuous, reliable power supplied by a system that's totally compatible with any load. The Spectron® LSN (Lite Safety Network) central lighting inverter system from Dual-Lite answers that call with high efficiency performance. These centrally located power sources include an intelligent, easy-to-use interface panel and automatic, programmable, self-diagnostic operation to deliver optimum safety.

SYNCHRON

SPECTRON® LSN
LIFE SAFETY NETWORK

Trident

The Dual-Lite Preventive Maintenance Program provides additional system warranty coverage for every need and budget beyond the standard factory warranty. In addition to emergency service, our factory trained technicians will visit the central lighting inverter site once a year to perform an inspection and monitor system diagnostics.

THE DUAL-LITE TOTAL SOLUTIONS APPROACH

Dual-Lite offers a full line of life safety products that meet your application's demands with a systematic, total solutions approach. Backed by the 100-year heritage of Hubbell Lighting, Inc., we will continue to provide quality lighting products incorporating the latest in product design, photometric performance and energy efficient technologies. Our goal is to empower you with a comprehensive product selection to fulfill the lighting requirements of even the most demanding application.
